Organization of Student Sessions

Kohta Juraku
Project Assistant Professor, UT

Why “Student Session”? 

- This Summer School is designed to learn very wide range of topics on Radioactive Waste Disposal intensively.
- Students are required to understand a variety of knowledge during very short term.
- Especially, they may not be accustomed to the lectures on social scientific fields.
- Interactive and self-motivated discussions are essential to help their deep and appropriate understanding.
The Concept of “Student Session”

- Allocate the last slot in each day for “Student Session” (except for 4th day).
- Students are requested to summarize the outline of lectures and to raise points for discussion by themselves.
- Lecturers and tutors are also welcome to join discussion.
- Intensive discussion will help deeper and multifaceted understanding.

Sessions of the students, by the students, for the students!

- Students both in Tokyo and US have communicated and discussed about the format of students session beforehand.
- They also had a meeting on the details of organization yesterday.
- Student Chairs
  - Tatsuhiko Ogawa (UT) & Denia Djokic (UCB)
- Sessions are conducted by a chair and two note-taker (by rotation).
**Improvement by the Students’ Efforts**

- This summer school is an important milestone for PAGES project.
- We have to take advantage of this trial for the development of an advanced education program by reflective follow-up.
- Students are required to submit reports based on the records of lectures and discussions in the student session.
- The report will become very fruitful reference for the future improvement of PAGES activities.
